## **PICO SKIN TIGHTENING**

60mins | \$450

The Discovery Laser Tightening treatment System utilizes multiple laser wavelengths and technologies. Some of these wavelengths are used for skin tightening, some for tattoo removal, and some for pigmented lesion removal.

The Discovery Pico Tightening produces Skin Cell Activation, which is a term relating to the skin cells talking to each other. Basically, certain proteins are released by the Focus laser treatment and then nearby cells detect this and are stimulated to produce more elastin and collagen. These are skin tightening chemicals. The net result is tighter, younger-looking skin with fewer wrinkles.

Downtime: Skin injury is rare and usually involves temporary skin redness, mild sun burn sensation and sometimes crusting for few days.

Clients can expect the following from this treatment: Skin tightening, Firming, Plumped and Hydrated.

Effective for: Wrinkles, Fine Lines, Sagging of the skin. All Skin Types

Results being achieved with very little redness, downtime, or pain being characteristics which are unique to the Discovery Pico.

Downtime: Your pigmentation may darken, lighten, fade or even appear to have no change immediately post treatment. On average, it takes 4-6 weeks for your body to process the pigment.

Effective for: Wrinkles, Age Spots, Fine Lines and Large Pores. All Skin Types

**Pico Pigmentation Platinum:** \$550 add LED/or Peptide Mask 75mins

## PICO SCAR REPAIR
